Jung and Kierkegaard Amy Cook 2017-08-24 Jung and Kierkegaard identifies authenticity, suffering and self-deception as the three key themes that connect the work of Carl Jung and Søren Kierkegaard. There is, in the thinking of these pioneering psychologists of the human condition, a fundamental belief in the healing potential of a religious outlook. This engaging and erudite text explores the significance of the similarities of thinking between Kierkegaard and Jung, bridging the gap between the former's particular brand of existential Christian psychology and the latter's own unique philosophy. Given the similarity of their work and experiences that were common to both of their personal biographies, particularly the relationship that each had with his father, one might expect Jung to have found in Kierkegaard a kindred spirit. Yet this was not the case, and Jung viewed Kierkegaard with great scorn. That there exists such a strong comparison and extensive overlap in the life and thought of these towering figures of psychology and philosophy leads us to question why it is that Jung so strongly rejected Kierkegaard. Such hostility is particularly fascinating given the striking similarity that Jung's own analytical psychology bears to the Christian psychology upheld by Kierkegaard. Cook's thought-provoking book fills a very real gap in Jungian scholarship and is the first attempt to undertake a direct comparison between Jung and Kierkegaard's models of development. It is therefore essential reading for academics and postgraduate students with an interest in Jungian and Kierkegaard scholarship, as well as psychology, philosophy and religion more generally.

The Adult Development of C.G. Jung (RLE: Jung) John-Raphael Staude 2014-07-17 Originally published in 1981, this study presents Jung's theory of adult personality development, and analyses and interprets in its biographical and historical context the genesis and development of Jung's theory of the individuation process. Dr Staude argues that an in-depth study of Jung's life offers insights into the patterns and processes of adult development, and he focuses particularly on Jung's writings during and immediately after his mid-life transition. He shows how Jung articulated his hard-won insights into adult development in his books and essays and into his analytic practice, and considers how Jung's developmental theory relates to the changes he experienced in his own life and in his socio-historical environment. Dr Staude concludes that Jung's emphasis on impersonal universals of human psychic development complements and supplements the personal emphasis of ego development theory and provides the foundations for a more holistic understanding of adult developmental psychology.

Collected Works of C.G. Jung, Volume 7 C. G. Jung 2014-03-01 This volume has become known as perhaps the best introduction to Jung's work. In these famous essays, "The Relations between the Ego and the Unconscious" and "On the Psychology of the Unconscious," he presented the essential core of his system. Historically, they mark the end of Jung's intimate association with Freud and sum up his attempt to integrate the psychological schools of Freud and Adler into a comprehensive framework. This is the first paperback publication of this key work in its revised and augmented second edition of 1966. The earliest versions of the Two Essays, "New Paths in Psychology" (1912) and "The Structure of the Unconscious" (1916), discovered among Jung's posthumous papers, are published in an appendix, to show the development of Jung's thought in later versions. As an aid to study, the index has been comprehensively expanded.

History of Psychiatry and Medical Psychology Edwin R. Wallace 2010-04-13 This book chronicles the conceptual and methodological facets of psychiatry and medical psychology throughout history. There are no recent books covering so wide a time span. Many of the facets covered are pertinent to issues in general medicine, psychiatry, psychoanalysis, and the social sciences today. The divergent emphases and interpretations among some of the contributors point to the necessity for further exploration and analysis.

Labyrinth Catrine Clay 2016-11-08 A sensational, eye-opening account of Emma Jung's complex marriage to Carl Gustav Jung and the hitherto unknown role she played in the early years of the psychoanalytic movement. Clever and ambitious, Emma Jung yearned to study the natural sciences at the University of Zurich. But the strict rules of proper Swiss society at the beginning of the twentieth century dictated that a woman of Emma's stature—one of the richest heiresses in Switzerland—travel to Paris to "finish" her education, to prepare for marriage to a suitable man. Engaged to the son of one of her father's wealthy business colleagues, Emma's conventional and predictable life was upended when she met Carl Jung. The son of a penniless pastor working as an assistant physician in an insane asylum, Jung dazzled Emma with his intelligence, confidence, and good looks. More important, he offered her freedom from the confines of a traditional haute-bourgeois life. But Emma did not know that Jung's charisma masked a dark interior—fostered by a strange, isolated childhood and the sexual abuse he'd suffered as a boy—as well as a compulsive philandering that would threaten their marriage. Using letters, family interviews, and rich, never-before-published archival material, Catrine Clay illuminates the Jung's unorthodox marriage and explores how it shaped—and was shaped by—the scandalous new movement of psychoanalysis. Most important, Clay reveals how Carl Jung could never have achieved what he did without Emma supporting him through his private torments. The Emma that emerges in the pages of Labyrinth is a strong, brilliant woman, who, with her husband's encouragement, becomes a successful analyst in her own right.

Map of the Soul - 7 Murray Stein 2020 "Beyond summarizing the three volumes on Persona, Shadow and Ego in the Map of the Soul series, this latest book explores the entire BTS album, start to finish, revealing profound insights into the collective psyche of BTS. The title of BTS's latest album, Map of the Soul: 7, captivates the mind with its suggestive and alluring imagery. It came as a surprise to many fans. Expected was an album that would follow upon Map of the Soul: Persona with songs about Shadow or Ego. While the new album does indeed include songs with these themes, it is much more complex and broader in vision than expected. The number 7 suggests mystery. It catches the mind's attention with its symbolic significance. What does this number mean in relation to the idea of a "map of the soul?" This book dives into this mystery and explores the unconscious reaches of our mind. Fans of BTS from around the world will marvel at the depth of meaning in the songs contained in Map of the Soul: 7. They take the listener into deep reflection upon the meaning of striving and ambition, the dangers of worldly success, and the amazing resiliency of the human spirit to recover and go on despite the pitfalls on life's journey. The songs themselves function as a map for souls who are setting out in life and engaging in challenging relationships. The songs are reflective, mirroring what we find within ourselves in our struggles to become and to thrive. When you stand on the threshold of a new land, it is useful to have a map as your guide. The great psychologist of the 20th Century, Carl Jung, created a Map of the Soul that many people in his time found more than a little helpful, even lifesaving. It is even more so now, for people in the 21st Century, caught in the profound complexities of modern life. Armed with this map, people are better able to find their way successfully through life's journey. Today, BTS is putting this map into the hands of their fans. For this great service we are profoundly very grateful!"--

Post-Jungian Criticism James S. Bauml 2004-01-01 Rereads Jung in light of contemporary theoretical concerns, and offers a variety of examples of post-Jungian literary and cultural criticism.

The Future of Training in Psychotherapy and Counselling John Rowan 2005 John Rowan presents a challenging account of the current state of training. In an attempt to look afresh at the whole question of training he proposes that there are three ways of doing therapy: the instrumental, the authentic and the transpersonal way.

Transrational Peace Research and Elicitive Facilitation Norbert Koppensteiner 2020-06-22 This book sheds new light on transrational approaches to peace research and highlights elicitive approaches to facilitation. Rather than encouraging researchers, teachers and practitioners to control and suppress their own positionality, the book argues that they can see themselves as a potential (re)source that can be creatively tapped for their work. Using dance as a central metaphor, it seeks to reposition research and facilitation as a truly experiential process where the entirety of human experiences and epistemologies can be brought into interplay, opening up new sources of knowledge. Providing a cutting-edge theoretical framework and based on his practical experience, the author demonstrates that facilitation and research are not just cognitive, but can also be(come) embodied, emotional, intuitive, relational and spiritual. By proposing a systematic, methodological framework for research and facilitation, the book offers practical guidance for peace practitioners, facilitators and researchers interested in working through all dimensions of their being and engaging with conflict transformation in a holistic way.

Man and His Symbols Carl Gustav Jung 1964 Explores Jung's psychological concepts regarding the nature, function and importance of man's symbols as they appear on both the conscious and subconscious level

Coming Together – Coming Apart John A. Desteian 2021-03-15 Relationships are hard enough to negotiate without advice from outsiders who don't know you at all. This book is not a "how-to" aimed at attaining the ideal. Rather, it is a how-it-is, an exploration of how relationships are, how they develop, how they deteriorate, how they may end and how they may even revive. Strange as it may seem, it is not a book about how individual human beings are. It doesn't concern itself with individual human failings. Those failings are given in being human. Instead, it describes the potentials for joy, disappointment and burden that are intrinsic to relationship and by extension to the process of becoming fully human. In a world obsessed with attaining an illusory ideal, becoming fully human is the greatest threat.

The Black Books (Slipcased Edition) (Vol. Seven-Volume Set) C. G. Jung 2020-10-13 Until now, the single most important unpublished work by C.G. Jung—The Black Books. In 1913, C.G. Jung started a unique self-experiment that he called his "confrontation with the unconscious": an engagement with his fantasies in a waking state, which he charted in a series of notebooks referred to as The Black Books. These intimate writings shed light on the further elaboration of Jung's personal cosmology and his attempts to embody insights from his self-investigation into his life and personal relationships. The Red Book drew on material recorded from 1913 to 1916, but Jung actively kept the notebooks for many more decades. Presented in a magnificent, seven-volume boxed collection featuring a revelatory essay by noted Jung scholar Sonu Shamdasani—illuminated by a selection of Jung's vibrant visual works—and both translated and facsimile versions of each notebook, The Black Books offer a unique portal into Jung's mind and the origins of analytical psychology.

The Word as True Myth Gary J. Dorrien 1997-01-01 Gary Dorrien follows the threads of theology through the twentieth century, examining how Christians have reconciled their myth-filled religious beliefs within a world secularized by Enlightenment criticism and science. To understand how religion keeps its place in Christians' lives, Dorrien writes, we must explore how modern theologians have answered the question of myth in today's Christianity. Dorrien's narrative walks readers through modern theology - stopping with each of the major thinkers along the way to see how they dealt with the issue of modern Christian mythology. Ultimately he offers his own "new neo-orthodoxy", a theology of Word and Spirit that is pluralistic and affirms the mythical character of the gospel while holding fast to the Gospels' myth-negating condemnation of idolatry and their focus on history.

Jung and Phenomenology Roger Brooke 2015-02-11 Jung and Phenomenology is a classic text in the field of Jungian scholarship. Originally published in 1991, it continues to be essential to conversations regarding the foundations of Jungian thought. This Classic Edition of the book includes a brand new introduction by the author. Jung described his own approach as phenomenological, particularly as it contrasted with Freud's psychoanalysis and with medical psychiatry. However, Jung's understanding of phenomenology was inconsistent, and he writes with an epistemological eclecticism which leaves him often at cross purposes with himself. In Jung and Phenomenology, Brooke systematically addresses the central ideas of Jung's thought. The major developments in the post-Jungian tradition are extensively integrated into the conversation, as are clinical issues, meaning that the book marks a synthesis of insights in the contemporary Jungian field. His reading and interpretation of Jung are guided by the question of what it is that Jung is trying to show but which tends to be obscured by his formulations. Examining the meaning of Jung's theoretical ideas in concrete existential terms, Jung and Phenomenology is essential reading for psychoanalysts, psychologists and students interested in the Jungian tradition and existential phenomenology.

The Soul's Code James Hillman 2017-08 "Plato called it "daimon," the Romans "genius," the Christians "guardian angel"; today we use such terms as "heart," "spirit," and "soul." While philosophers and psychologists from Plato to Jung have studied and debated the fundamental essence of our individuality, our modern culture refuses to accept that a unique soul guides each of us from birth, shaping the course of our lives. In this extraordinary bestseller, James Hillman presents a brilliant vision of our selves, and an exciting approach to the mystery at the center of every life that asks, "What is it, in my heart, that I must do, be, and have? And why?" Drawing on the biographies of figures such as Ella Fitzgerald and Mohandas K. Gandhi, Hillman argues that character is fate, that there is more to each individual than can be explained by genetics and environment. The result is a reasoned and powerful road map to understanding our true nature and discovering an eye-opening array of choices—from the way we raise our children to our career paths to our social and personal commitments to achieving excellence in our time."--

Jung and the Post-Jungians Andrew Samuels 2003-09-02 This bestseller is a comprehensive review of the developments which have taken place in Jungian psychology since Jung's death.

Jung's Map of the Soul Murray Stein 1998-03-01 More than a mere overview, the book offers readers a strong grounding in the basic principles of Jung's analytical psychology in addition to illuminating insights.

Alchemy, Jung, and Remedios Varo Dennis Pottenger 2021-05-04 Alchemy, Jung, and Remedios Varo offers a depth psychological analysis of the art and life of Remedios Varo, a Spanish surrealist painter. The book uses Varo's paintings in a revolutionary way: to critique the patriarchal underpinnings of Jungian psychology, alchemy, and Surrealism, illuminating how Varo used painting to address cultural complexes that silence female expression. The book focuses on how the practice of alchemical psychology, through the power of imagination and the archetypal Feminine, can lead to healing and transformation for individuals and culture. Alchemy, Jung, and Remedios Varo offers the first in-depth psychological treatment of the role alchemy played in the friendship between Varo and Leonora Carrington—a connection that led to paintings that protest the pitfalls of patriarchy. This unique book will be of great interest for

academics, scholars, and post-graduate students in the fields of analytical psychology, art history, Surrealism, cultural criticism, and Jungian studies.

**Human Development and Faith (Second Edition)** Felicity Kelcourse 2015-07-28 This book, now in its second edition, brings together the best available understandings of human development from a multidisciplinary perspective. Uniquely inclusive of the moral and faith dimensions of context and life-cycle development, *Human Development and Faith* examines the interplay of mind, body, family, community, and soul at every stage of development. It addresses two central questions: What are the "good-enough" conditions of parenting, family, and community in each phase of life, from birth to death, that support growth and development? What gives life adequate meaning as development proceeds? If human development describes the normative and hoped-for passages of life, then faith provides the necessary component of meaning. Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live. The *Journal of Pastoral Theology* called the first edition of *Human Development and Faith* "an excellent text for pastoral theology courses, because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development." This second edition includes a new chapter on infancy, updates reflecting our growing awareness of cultural diversity, and a new preface.

**Map of the Soul – Persona** Murray Stein 2019-05-16 There is a lot of interest in today's culture about the idea of Persona and the psychological mapping of one's inner world. In fact, the interest is so strong that the superstar Korean Pop band, BTS, has taken Dr. Murray Stein's concepts and woven them into the title and lyrics of their latest album, *Map of the Soul: Persona*. What is our persona and how does it affect our life's journey? What masks do we wear as we engage those around us? Our persona is ultimately how we relate to the world. Combined with our ego, shadow, anima and other intra-psychic elements it creates an internal map of the soul. T.S. Eliot, one of the most famous English poets of the 20th Century, wrote that every cat has three names: the name that everybody knows, the name that only the cat's intimate friends and family know, and the name that only the cat knows. As humans, we also have three names: the name that everybody knows, which is the public persona; the name of that only your close friends and family know, which is your private persona; and the name that only you know, which refers to your deepest self. Many people know the first name, and some people know the second. Do you know your secret name, your individual, singular, unique name? This is a name that was given to you before you were named by your family and by your society. This name is the one that you should never lose or forget. Do you know it?

**Shadow Working in Project Management** Joana Bertholo 2017-07-06 *Shadow Working in Project Management* aims at contributing to our knowledge of all things unconscious and irrational in our behaviour. It takes the form of an empirical research, and therefore addresses mostly the tools and techniques available to get in touch with Shadow aspects of self and collective, to recognize how it manifests, how it can lead to conflict, and ways to address it. From that perspective, it advances on to question the underlying beliefs of current management practices. It explores as well the inherent need for control in projects, being those of a professional nature, or other ventures. It challenges the strength of the concept of the "rational man" and its protagonism. Joana Bertholo's work explores the role and nature of the Shadow in the context of projects and their management, with an emphasis on techniques to address it. Despite being directed to managers and dedicated to the analyses of the managerial discourse, the tools and processes it proposes have universal relevance, based on the fact that the Shadow is everywhere, within everyone, from the individual to the global scale.

**White Bird, Black Serpent, Red Book** Stuart Douglas 2018-04-17 This book examines the influence of Gnostic philosophy on Jungian psychology as indicated by Jung's essay, 'The Transcendent Function' (1916), and his Gnostic-inspired treatise, *The Seven Sermons to the Dead* (also written in 1916). Relevant and timely due to the relatively recent publication of Jung's *The Red Book*, the hypothesis of this work is that the *Seven Sermons* is the mythopoetic, metaphysical twin of 'The Transcendent Function' and that these texts can be considered as two sides of the same coin. The *Seven Sermons* formed a prelude to everything Jung was to communicate about the unconscious-in other words, an embryonic form of the principal tenets of analytical psychology can be found in a Gnostic-inspired text. As Gnostic philosophy was the inspiration for both texts, this book also highlights correspondences between both of Jung's works and the Gnostic texts of the Nag Hammadi Library, paying particular attention to the theme of the opposites-arguably the crucial theme at the very heart of Jung's psychology.

**Public Relations Ethics and Professionalism** Johanna Fawkes 2014-08-01 Do professions really place duty to society above clients' or their own interests? If not, how can they be trusted? While some public relations (PR) scholars claim that PR serves society and enhances the democratic process, others suggest that it is little more than propaganda, serving the interests of global corporations. This is not an argument about definitions, but about ethics - yet this topic is barely explored in texts and theories that seek to explain PR and its function in society. This book places PR ethics in the wider context of professional ethics and the sociology of professions. By bringing together literature from fields beyond public relations - sociology, professional and philosophical ethics, and Jungian psychology - it integrates a new body of ideas into the debate. The unprecedented introduction of Jungian psychology to public relations scholarship shifts the debate beyond a traditional Western 'Good/Bad' ethical dichotomy towards a new holistic approach, with dynamic implications for theory and practice. This thought-provoking book will be essential reading for students, academics and professionals with an interest in public relations, ethics and professionalism.

**The Happy Introvert** Elizabeth Wagele 2006 A lighthearted guide to achieving inner fulfillment in spite of an introverted personality challenges popular misconceptions that introverts are victims of depression or other disorders, in a reference that explains how to excel in areas where an introverted personality is a benefit while finding the inner strength to negotiate and be a self-advocate in an extroverted world. Original.

**Androgyny** June Singer 2000-02-01 Full of psychological and spiritual insights that speak to today's sexual confusion. Singer shows how a person can at once embrace complementary and contradictory attitudes toward sex and gender. Finally, she proposes a range of choices by which people can identify themselves, secure that the masculine/feminine interaction within each individual is not only normal, but the dynamic factor in their wholeness.

**C.G. Jung and the Humanities** Karin Barnaby 2017-03-14 C. G. Jung has been and continues to be a pervasive yet often unacknowledged presence in twentieth-century art and intellectual life. This timely volume is the first comprehensive attempt to assess this presence and to demonstrate Jung's far-reaching cultural impact. The distinguished contributors represent a number of views, from traditional Jungian to the most contemporary post-Jungian stances, including feminist, non-Jungian, and anti-Jungian positions. Jung, as seen in this volume, addresses a wide range of contemporary issues related to creativity, gender, religion, popular culture, and hermeneutics. The essays reveal dimensions of his work that extend far beyond psychoanalytical theory and that show his hermeneutics to be a much more subtle and sophisticated methodology than previously allowed by his critics. This methodology appears, in fact, to have anticipated significant aspects of contemporary critical principles and practice. The contributors to the volume were among the participants in a major international conference sponsored by Hofstra University and the C. G. Jung Foundation of New York, held in 1986 at Hofstra University. They include Thomas Belmonte, Robert Bly, Joseph Campbell, Edward S. Casey, Stanley Diamond, Jean Erdman, Leslie Fiedler, James Hillman, Paul Kugler, Ibram Lassaw, Neil Levine, David L. Miller, Lucio Pozzi, Gilles Quispel, Robert Richtenburg, Carol Schreier Rupprecht, Andrew Samuels, Harold Schechter, and June Singer. Originally published in 1990. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**C. G. Jung and the Alchemical Imagination** Stanton Marlan 2020-12-29 Stanton Marlan brings together writings which span the course of his career, examining Jungian psychology and the alchemical imagination as an opening to the mysteries of psyche and soul. Several chapters describe a telos that aims at the mysterious goal of the Philosophers' Stone, a move replete with classical and postmodern ideas catalysed by prompts from the unconscious: dreams, images, fantasies, and paradoxical conundrums. Psyche and matter are seen with regards to soul, light and darkness in terms of illumination, and order and chaos as linked in the image of chaosmos. Marlan explores the richness of the alchemical ideas of Carl Jung, James Hillman, and others and their value for a revisioning of psychology. In doing so, this volume challenges any tendency to literalism and essentialism, and contributes to an integration between Jung's classical vision of a psychology of alchemy and Hillman's *Alchemical Psychology*. *C.G. Jung and the Alchemical Imagination* will be a valuable resource for academics, scholars, and students of Jungian and post-Jungian studies, Jungian analysis, and psychotherapy. It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training.

**Blake, Jung, and the Collective Unconscious** June Singer 2000-03-01 In this thoughtful discussion of Blake's well-known *Marriage of Heaven and Hell*, Singer shows us that Blake was actually tapping into the collective unconscious and giving form and voice to primordial psychological energies, or archetypes, that he experienced in his inner and outer world. With clarity and wisdom, Singer examines the images and words in each plate of Blake's work, applying in her analysis the concepts that Jung brought forth in his psychological theories.

**Liber Novus** C. G. Jung 2012-12-17 Presents the Swiss psychologist's thoughts, experiences, and everything he felt after a period of time spent seeing visions, hearing voices, and inducing hallucinations.

**The Soul of Art** Christian Gaillard 2017-05-17 The beginnings of art are lost in the dim reaches of prehistory, eons before humans began recording and codifying their experiences in writing. And yet philosophers, artists, and historians have for centuries noted the intimate and perhaps inseparable relationship between human consciousness and the artistic impulse. As analyst and professor Christian Gaillard notes, we can see some of the earliest expressions of this

intimacy in the cave paintings at Lascaux, and the relationship continues to the present day in the works of modern creators such as Jackson Pollock and Anselm Kiefer. What fascinates Gaillard—and, indeed, what fascinated Carl Jung—is, among other things, the notion that art enables us to explore our inner landscapes in ways that are impossible by any other means. In *The Soul of Art: Analysis and Creation*, Gaillard takes readers on a tour of his own “gallery of the mind,” examining works of art from throughout history—and prehistory—that have moved, challenged, and changed him. He also explores instances where particular works of art have proven deeply significant in his or his colleagues’ understanding of their analyses and their ability to serve as capable guides on the journey toward self-awareness.

*Map of the Soul-ego* Murray Stein 2020 In *Map of the Soul - Ego: I Am, Dr. Murray Stein* explores the beginnings of consciousness and the concept of the “I,” as well as the evocative lyrics from the Korean Pop band BTS’s album, *Map of the Soul: 7*. BTS’s album series titled *Map of the Soul* was largely inspired by Dr. Stein’s presentation of C.G. Jung’s groundbreaking psychological insights. Ego is the center of consciousness. Yet, “ego can separate itself from the body, and then become a virtual reality in its own right.” This book is an overview of the ego from a Jungian perspective but also is a rich and nuanced examination of how the creative spark can ignite and sustain meaningful psychological growth. The author and collaborators are deeply indebted to BTS, whose worldwide popularity points to their remarkable ability to tap into universal themes. BTS’s music inspired this work and this introductory series of books may inspire others to explore their inner life. Table of Contents 1. Introduction 2. BTS and Outro: Ego 3. *The Tao of Jung* David H. Rosen 2019-03-25 This work tracks Carl Jung’s life and spiritual development as the embodiment of the way of the Tao. Jung was well acquainted with the body of Tao knowledge—in his later years he was close to and worked with Wilhelm, a translator of the *I Ching*. Rosen finds that Jung’s life and his psychology reveal the Tao at work. His description of the natural world of the psyche is similar to the natural world as described by Taoists. The essence of both philosophies is that the integration of opposites, such as shadow/persona and yin/yang, leads to wholeness. The Tao, Rosen holds, enabled Jung, who started out as a Freudian, to leave Freud in the major crisis of his life and to end up a more complete person. Rosen’s book is modeled on the *Tao Te Ching* itself and invites readers to further explore the connection between Tao and Jung by looking to the works of the two themselves.

*Jung’s Red Book For Our Time* Murray Stein 2020-03-12 Edited by Murray Stein and Thomas Arzt, the essays in the series *Jung’s Red Book for Our Time: Searching for Soul under Postmodern Conditions* are geared to the recognition that the posthumous publication of *The Red Book: Liber Novus* by C. G. Jung in 2009 was a meaningful gift to our contemporary world. “To give birth to the ancient in a new time is creation,” Jung inscribed in his *Red Book*. The essays in this volume continue what was begun in Volume 1 of *Jung’s Red Book for Our Time: Searching for Soul under Postmodern Conditions* by further contextualizing *The Red Book* culturally and interpreting it for our time. It is significant that this long sequestered work was published during a period in human history marked by disruption, cultural disintegration, broken boundaries, and acute anxiety. *The Red Book* offers an antidote for this collective illness and can be seen as a link in the aurea catena, the “golden chain” of spiritual wisdom extending down through the ages from biblical times, ancient Greek philosophy, early Christian and Jewish Gnosis, and alchemy. *The Red Book* is itself a work of creation that gives birth to the old in a new time. This is the second volume of a three-volume series set up on a global and multicultural level and includes essays from the following distinguished Jungian analysts and scholars: - Murray Stein and Thomas Arzt Introduction - John Beebe *The Way Cultural Attitudes are Developed in Jung’s Red Book* - An “Interview” - Kate Burns *Soul’s Desire to become New: Jung’s Journey, Our Initiation* - QiRe Ching *Aging with The Red Book* - Al Collins *Dreaming The Red Book Onward: What Do the Dead Seek Today?* - Lionel Corbett *The Red Book as a Religious d104* - John Dourley *Jung, the Nothing and the All* - Randy Fertel *Trickster, His Apocalyptic Brother, and a World’s Unmaking: An Archetypal Reading of Donald Trump* - Noa Schwartz Feuerstein *India in The Red Book Overtones and Undertones* - Grazina Gudaite *Integrating Horizontal and Vertical Dimensions of Experience under Postmodern Conditions* - Lev Khagai *The Red Book of C.G.
