Daniel, Volume 30 Dr. John Goldingay 2019-12-03 The Word Biblical Commentary delivers the best in biblical scholarship, from the leading scholars of our day who share a commitment to Scripture as divine revelation. This series emphasizes a thorough analysis of textual, linguistic, structural, and theological evidence. The result is judicious and balanced insight into the meanings of the text in the framework of biblical theology. These widely acclaimed commentaries serve as exceptional resources for the professional theologian and instructor, the seminary or university student, the working minister, and everyone concerned with building theological understanding from a solid base of biblical scholarship. Overview of Commentary Organization Introduction--covers issues pertaining to the whole book, including context, date, authorship, composition, interpretive issues, purpose, and theology. Each section of the commentary includes: Pericope Bibliography--a helpful resource containing the most important works that pertain to each particular pericope. Translation--the author's own translation of the biblical text, reflecting the end result of exegesis and attending to Hebrew and Greek idiomatic usage of words, phrases, and tenses, yet in reasonably good English. Notes--the author's notes to the translation that address any textual variants, grammatical forms, syntactical

constructions, basic meanings of words, and problems of translation. Form/Structure/Setting--a discussion of redaction, genre, sources, and tradition as they concern the origin of the pericope, its canonical form, and its relation to the biblical and extra-biblical contexts in order to illuminate the structure and character of the pericope. Rhetorical or compositional features important to understanding the passage are also introduced here. Comment--verse-by-verse interpretation of the text and dialogue with other interpreters, engaging with current opinion and scholarly research. Explanation--brings together all the results of the discussion in previous sections to expose the meaning and intention of the text at several levels: (1) within the context of the book itself; (2) its meaning in the OT or NT; (3) its place in the entire canon; (4) theological relevance to broader OT or NT issues. General Bibliography--occurring at the end of each volume, this extensive bibliography contains all sources used anywhere in the commentary.

Global Trends 2030 National Intelligence Council (U.S.) 2012 This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Model Rules of Professional Conduct American Bar Association. House of Delegates 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The Tongue and Quill Air Force 2019-10-11 The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's

Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

Governance, Natural Resources and Post-Conflict Peacebuilding Carl Bruch 2016-04-07 When the guns are silenced, those who have survived armed conflict need food, water, shelter, the means to earn a living, and the promise of safety and a return to civil order. Meeting these needs while sustaining peace requires more than simply having governmental structures in place; it requires good governance. Natural resources are essential to sustaining people and peace in post-conflict countries, but governance failures often jeopardize such efforts. This book examines the theory, practice, and often surprising realities of post-conflict governance, natural resource management, and peacebuilding in fifty conflict-affected countries and territories. It includes thirty-nine chapters written by more than seventy researchers, diplomats, military personnel, and practitioners from governmental, intergovernmental, and nongovernmental organizations. The book highlights the mutually reinforcing relationship between natural resource management and good governance. Natural resource management is crucial to rebuilding governance and the rule of law, combating corruption, improving transparency and accountability, engaging disenfranchised populations, and building confidence after conflict. At the same time, good governance is essential for ensuring that natural resource management can meet immediate needs for post-conflict stability and development, while simultaneously laying the foundation for a sustainable peace. Drawing on analyses of the close relationship between governance and natural resource management, the book explores lessons from past conflicts and ongoing reconstruction efforts; illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives; and presents an emerging theoretical and practical framework for policy makers, researchers, practitioners, and students. Governance, Natural Resources, and Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions from practitioners, policy makers, and researchers. Other books in this series address high-value resources, land, water, livelihoods, and assessing and restoring natural resources.

Our Common Agenda - Report of the Secretary-General United Nations 2021-09-10 On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at

the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the

future of parenting policy, research, and practice in the United States.

World Development Report 2011 World Bank 2011-05-01 The 2011 WDR on Conflict, Security and Development underlines the devastating impact of persistent conflict on a country or region's development prospects - noting that the 1.5 billion people living in conflict-affected areas are twice as likely to be in poverty. Its goal is to contribute concrete, practical suggestions on conflict and fragility.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Protecting Human Rights and Building Peace in Post-Violence Societies Nasia Hadjigeorgiou 2020-02-20 This book critically

examines the relationship between protecting human rights and building peace in post-violence societies. It explores the conditions that must be present, and strategies that should be adopted, for the former to contribute to the latter. The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their grievance, and by encouraging the state to respond to and provide them with a meaningful remedy. This usually happens either through a process of adjudication, whereby human rights can offer guidance to the judiciary as to the best way to address such grievances, or through the passing and implementation of human rights laws and policies that seek to promote peace. However, this positive relationship between human rights and peace is both qualified and context specific. Through an interdisciplinary and comparative analysis of four case studies, the book identifies the conditions that can support the effective use of human rights as peacebuilding tools. Developing these, the book recommends a series of strategies that peacebuilders should adopt and rely on.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Moving Toward a Just Peace Jan Marie Fritz 2013-11-18 Mediation, the facilitated discussion of disputes and conflicts, is a flexible approach that can be used at all levels of intervention to move us toward a global peace that is both inclusive and fair. This volume, edited by Jan Marie Fritz, brings together mediators, scholar-practitioners, and a veteran diplomat to discuss the life and times of mediation in very different settings. The 14 chapters include three essays about culture, creativity, and models/theories/approaches. And there are ten chapters about practice: community mediation, mediation by police, special education mediation; interventions on behalf of widows in Nigeria; capacity-building work in Burundi; mediation in Israel; the creative facilitation of meetings; community conferencing; UN Security Council Resolution 1325 (Women and Peace and Security) and the role of civil society organizations in peacebuilding. This volume discusses the expanding roles - from prevention through societal transformation - assumed by mediators and the urgent need for mediators working at different intervention levels to learn from each other. This volume is a must read for scholars, researchers, policymakers, civil society representatives and practitioners with interests in effective dispute and conflict intervention. It particularly is recommended for those managing dispute and conflict intervention processes.

To Make the Earth Whole Marc Gopin 2009-06-15 To Make the Earth Whole studies the art of citizen diplomacy_a process that can address clashes of religion and culture across regional lines even when traditional negotiations between governments can fail. While faith and regional differences have been sources of division around the world in recent decades, millions of citizens are also creating bonds of friendship and collaboration that are forming the basis of a global community. Drawing on the experiences gleaned from years practicing citizen diplomacy in some of the world's most politically charged climates, scholar-practitioner of conflict resolution and rabbi Marc Gopin describes his work in Syria as a central case study of the book. The author outlines the strategic basis for creating community across lines of enmity, the social network theory to explain how this happens, and the long term vision required for a progressive but inclusive global community that respects religious communities even as it limits their coercive power over others. This powerful and practical book outlines an incremental and evolutionary strategy of positive change that stands a strong chance of success, even in today's most conservative and repressive religious and political contexts. To Make the Earth Whole also examines the ethical challenges of citizen diplomacy from the perspectives of both Western and Eastern philosophies and religions. The world's wisdom traditions are essential in devising a way for citizens to develop the foundations for global community.

Working Through Conflict Joseph P. Folger 2021-04-08 This fully updated ninth edition provides an introduction to conflict and conflict management that is firmly grounded in current theory, research, and practice. Covering a range of conflict settings,

including interpersonal, group, and organizational conflicts, it includes an abundance of real-life case studies that encompass a spectrum of theoretical perspectives. Its emphasis on application makes it highly accessible to students, while expanding their comprehension of conflict theory and practical skills. This new edition features a new chapter presenting key principles students can practice to become more skillful at managing conflict, a wealth of up-to-date research and case examples, suggested readings and video resources, and integrated questions for review and discussion. This textbook can be used in undergraduate or graduate courses on conflict in communication, business and management, political science, and counseling programs. Online resources for instructors, including PowerPoint slides and an instructor's manual, can be found at www.routledge.com/cw/folger.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status,

so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Water, Security and U.S. Foreign Policy David Reed 2017-06-26 The prosperity and national security of the United States depend directly on the prosperity and stability of both partner and competing countries around the world. Today, U.S. interests are under rising pressure from water scarcity, extreme weather events and water-driven ecological change in key geographies of strategic interest to the U.S. Those water-driven stresses are undermining economic productivity, weakening governance systems and fraying social cohesion in scores of countries and, in the process, undermining the vitality of rural livelihoods, fostering local and ethnic conflicts, driving broad migratory movements and contributing to the growth of insurgencies and terrorist networks. While the U.S. intelligence community has steadily expanded natural resource concerns in their global threat analyses, our overseas development assistance remains locked into provision of water and hygienic services rather than responding to the full sweep of global water challenges including governance and policy failures, growing conflicts over water and the need for promoting sustainable transboundary water arrangements in partner countries. A fundamental departure from the past is urgently needed. Based on 18 case studies, *Water, Security and U.S. Foreign Policy* provides an analytical framework to help policy makers, scholars and researchers studying the intersection of U.S. foreign policy with the environment and sustainability issues, interpret the impacts of water-driven social disruptions on the stability of partner governments and U.S. interests abroad. The book also delivers specific recommendations to reorient U.S. development and diplomatic engagements that can forestall and prevent social disruptions and ensuing threats to U.S. prosperity and national security.

Azerbaijan: Moving Toward More Diversified, Resilient, and Inclusive Development Aimee Hampel-Milagrosa 2020-08-01 Azerbaijan has set the course for the economy to reduce its dependence on oil by promoting new drivers of growth. By 2025, under the government's Strategic Road Maps, a more diversified economy should take shape led by three sectors: agriculture, tourism, and manufacturing. Bold reforms need to strengthen areas of the economy that could otherwise impede this transition, and policy makers must resolutely stay on the reform path. The core message of this publication is diversification toward non-oil sources of growth alongside efforts to reduce macroeconomic risks and the high cost of finance, make the education system responsive to the needs of the labor market, close infrastructure gaps, and help economically significant state-owned enterprises

become more efficient.

Between Eden and Armageddon Marc Gopin 2002-11-07 Recent years have seen a meteoric rise in the power and importance of organized religion in many parts of the world. At the same time, there has been a significant increase in violence perpetrated in the name of religion. While much has been written on the relationship between violence and religious militancy, history shows that religious people have also played a critical role in peacemaking within numerous cultures. In the new century, will religion bring upon further catastrophes? Or will it provide human civilization with methods of care, healing, and the creation of peaceful and just societies? In this groundbreaking book, Marc Gopin integrates the study of religion with the study of conflict resolution. He argues that religion can play a critical role in constructing a global community of shared moral commitments and vision--a community that can limit conflict to its nonviolent, constructive variety. If we examine religious myths and moral traditions, Gopin argues, we can understand why and when religious people come to violence, and why and when they become staunch peacemakers. He shows that it is the conservative expression of most religious traditions that presents the largest challenge in terms of peace and conflict. Gopin considers ways to construct traditional paradigms that are committed to peacemaking on a deep level and offers such a paradigm for the case of Judaism. Throughout, Gopin emphasizes that developing the potential of the world's religions for coping with conflict demands a conscious process on the part of peacemakers and theologians. His innovative and carefully argued study also offers a broad set of recommendations for policy planners both inside and outside of government.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
