Impact Evaluation in Practice, Second Edition Paul J. Gertler 2016-09-12 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

The First Book of Moses, Called Genesis 1999 The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

**Operation Overflight** Francis Gary Powers 2004 In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero.

**The Long Game** Rush Doshi 2021-06-11 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich

base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Global Trends 2030 National Intelligence Council (U.S.) 2012 This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated

people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

*Global Trends 2030 National Intelligence Council 2012-12-01 FULL COLOR PUBLICATION.* Global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. Appropriate for anyone, from business to banks, government to start-ups, technology to teachers and more, this publication helps anticipate where the world will be socially, politically, technically and culturally over the next few decades.

*Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine 2017-10-28* Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to

convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Two Nations Andrew Hacker 2010-05-11 In this groundbreaking study, Andrew Hacker offers a fresh and disturbing examination of the divisions of color and class in present-day America, analyzing the conditions that keep black and white Americans dangerously far apart in their ability to achieve the American dream. Why, despite continued efforts to increase understanding and expand opportunities, do black and white Americans still lead separate lives, continually marked by tension and hostility? In his much-lauded classic and updated version reflecting the changing realities of race in our nation, Andrew Hacker explains the origins and meaning of racism and clarifies the conflicting theories of equality and inferiority. He paints a stark picture of racial inequality in America—focusing on family life, education, income, and employment—and explores the controversies over politics, crime, and the causes of the gap between the races. Reasoned, accurate, and devastating, Two Nations demonstrates how this great and dividing issue has defined America's history and the pivotal role it will play in the future.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to

come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Two Nations in Your Womb Yi?r?'l Ya?aqov Yuval 2006-07-25 Offers a provocative look at the relationship between Judaism and Christianity, arguing that the inter-religious polemic between the two religions served as a substantial component in the formation of each and that the impact of Christianity on Talmudic and medieval Judaism was much stronger than previously assumed.
