Mastering Citrix® XenDesktop® Govardhan Gunnala 2015-06-30 Nowadays, many organizations are moving toward desktop virtualization. Citrix® XenDesktop® is the most comprehensive solution to implement a scalable and high performance virtual desktop environment. This book will provide you with the technical skills you need to successfully design, set up, and maintain a XenDesktop® environment. This book will introduce you to the main components of a XenDesktop® infrastructure and covers how to design and install them. Through each chapter, you will quickly learn how to configure your virtual desktop environment in order to meet specific end user requirements, giving your users the freedom to work from anywhere and from any device while virtual desktops and apps are centrally maintained in your data center.

Appendices: Persistent Traditions Luc W.S.W. Amkreutz 2013-12-19 The adoption of agriculture is one of the major developments in human history. Archaeological studies have demonstrated that the trajectories of Neolithisation in Northwest Europe were diverse. This book presents a study into the archaeology of the communities involved in the process of Neolithisation in the Lower Rhine Area (5500-2500 cal BC). It elucidates the role played by the indigenous communities in relation to their environmental context and in view of the changes that becoming Neolithic brought about. This volume contains the appendices to the thesis 'Persistent traditions. A long-term perspective on communities in the process of Neolithisation in the Lower Rhine Area (5500-2500 cal BC)'. These constitute a comprehensive inventory of 159, mostly excavated, archaeological sites in the Lower Rhine Area for which general characteristics were recorded. Their analysis shows that the succession of Late Mesolithic, Swifterbant culture, Hazendonk group and Vlaardingen culture societies represents a continuous long-term tradition of inhabitation of the wetlands and wetland margins of this area, forming a culturally continuous record of communities in the transition to agriculture. The site catalogue forms both an overview of, and detailed introduction into, the site-based archaeology of this time frame. After demonstrating the diversity of the Mesolithic, the subsequent developments regarding Neolithisation are studied from an indigenous perspective. Foregrounding the relationship between local communities and the dynamic wetland landscape, the archaeological evidence regarding its regional inhabitation points to long-term flexible behaviour and pragmatic decisions being made. For the interpretation of Neolithisation this study offers a complementary approach to existing research. Instead of arguing for a short transition based on the economic importance of domesticates and cultigens at sites, the emphasis is placed on the persistent traditions of the communities involved. New elements, instead of bringing about radical changes, are shown to be attuned to existing hunter-gatherer practices. By documenting indications of the mentalité of the inhabitants of the wetlands, it is demonstrated that their mindset remained essentially 'Mesolithic' for millennia.

Video Conference as a Tool for Higher Education Enrica Caporali 2012 The book describes the activities of the consortium member institutions in the framework of the TEMPUS IV Joint Project ViCES - Video Conferencing Educational Services (144650-TEMPUS-2008-IT-JPGR). In order to provide the basis for the development of a distance learning environment based on video conferencing systems and develop a blended learning courses methodology, the TEMPUS Project ViCES (2009-2012) was launched in 2009. This publication collects the conclusion of the project and it reports the main outcomes together with the approach followed by the different partners towards the achievement of the project's goal. The book includes several contributions focussed on specific topics related to videoconferencing services, namely how to enable such services in educational contexts so that, the installation and deployment of videoconferencing systems could be conceived an integral part of virtual open campuses.

Issues in Teaching, Learning and Testing Speaking in a Second Language Mirosław Pawlak 2014-11-13 The volume constitutes a state-of-the-art account of issues related to teaching, learning and testing speaking in a second language. It brings together contributions by Polish and international scholars which seek to create links between theory, research and classroom practice, report the findings of studies investigating the impact of linguistic, cognitive and affective factors on the development and use of speaking skills, and provide concrete pedagogic proposals for instruction and assessment in this area. As such, the book will be of interest not only to second language acquisition theorists and researchers, but also to foreign language teachers willing to enhance the quality of speaking instruction in their classrooms.

Screens and Scenes Richard Kern 2018-06-21 This book examines the relationships between online visual interfaces and language use in educational contexts and the features that underpin them to explore the complex nature of online communication and its implications for educational practice. Adopting a case study approach featuring a global range of examples, the volume uniquely focuses on multimodal intercultural interactions, with a particular interest in videoconferencing, to look at how they project and reflect particular cultural values and tendencies concerning language use and how they elucidate the complex cultural identifications and affiliations inherent in intercultural encounters. The book employs a diverse range of theoretical and research frameworks to highlight the dynamic connections between digital technology, social life, and language use, and the ways in which they can inform language education, making this an ideal resource for students and scholars in applied linguistics, communication studies, media studies, information studies, and education.

Lipopolysaccharide Transport Paola Sperandio 2022-09-24 This volume provides the most widely used protocols and techniques employed in lipopolysaccharide (LPS) transport studies. Chapters detail identification and analysis of essential genes and crucial mutations in LPS transport-related genes, LPS profile determination, LPS chemical analysis, protein-LPS interaction, and LPS visualization. Written in the format of the highly successful Methods in Molecular Biology series, each chapter includes an introduction to the topic, lists necessary materials and reagents, includes tips on troubleshooting and known pitfalls, and step-by-step, readily reproducible protocols. Authoritative and cutting-edge, Lipopolysaccharide Transport: Methods and Protocols aims to deliver an overview on the multidisciplinary study of LPS transport and to identify new and innovative antibacterial strategies.

Homelessness Prevention and Intervention in Social Work Heather Larkin 2019-06-26 This important text provides a comprehensive survey of homelessness in America: its scope and causes, its diverse populations, and the array of responses at the individual, community, and systems levels. Expert contributors explore the links between trauma and homelessness, the cycle of homelessness and health/mental health problems, and barriers preventing people from accessing services. Case studies of effective programs and practices focus on science-based interventions, broad understanding of client needs, and close coordination between systems and agencies. Finally, specialized chapters discuss issues and experiences common to homeless youth and young adults, including housing instability on college campuses and empowerment-based strategies for engaging youth voice in programming. Included in the coverage: Homelessness and health disparities: a health equity lens Affordable housing and housing policy responses to homelessness Street talk: homeless discourses and the politics of service provision Multisectoral collaborations to address homelessness Trauma-informed care in homelessness service settings: challenges and opportunities Incorporating youth voice into services for young people experiencing homelessness Homelessness Prevention and Intervention in Social Work fills a critical gap in the social work curriculum as a main or a supplementary text. It also makes an accessible resource for clinicians and community practitioners seeking current knowledge on the topic, practical approaches to working with clients experiencing homelessness, and useful information for effective program and policy design.

Membrane Biophysics Hongda Wang 2017-11-21 This book highlights recent advances in and diverse techniques for exploring the plasma membrane's structure and function. It starts with two chapters reviewing the history of membrane research and listing recent advances regarding membrane structure, such as the semi-mosaic model for red blood cell membranes and the protein layer-lipid-protein island model for nucleated tissue cell membranes. It subsequently focuses on the localization and interactions of membrane components, dynamic processes of membrane transport and transmembrane signal transduction. Classic and cutting-edge techniques (e.g. high-resolution atomic force microscopy and super-resolution fluorescence microscopy) used in biophysics and chemistry are presented in a very comprehensive manner, making them useful and accessible to both researchers in the field and novices studying cell membranes. This book provides readers a deeper understanding of the plasma membrane's organization at the single molecule level and opens a new way to reveal the relationship between the membrane's structure and functions, making it essential reading for researchers in various fields.

How I Did It Nate Clark 2020-07-14 How I Did It is a candid, thorough, science-based approach to losing fat, complete with workout plans and instructions for balancing macronutrients. It's full of personal insight, humor, stoic wisdom, and simple strategies that anyone can implement, no matter how hectic life gets. Do you dream of being lean and fit, but think it's impossible for you? It's absolutely possible and MUCH easier than you think! The key to losing weight is to maintain a caloric deficit. This book helps you calculate a caloric deficit to maximize fat loss and gain muscle without feeling tired and hungry. You don't need to starve yourself to lose fat. It's all about the math, pure and simple. How I Did It teaches you how to create a comfortable deficit of calories that will lead to incredible results. This book tells you how to get the body you've always wanted-no matter your age or current fitness level-without extreme dieting, excessive cardio, boot camp classes, or dangerous supplements. No expensive equipment. No "bro-science" and no crawling across the gym floor on all-fours like an ass*le. If you need a painless, feasible plan for getting in shape, you want to read this book. Losing fat isn't a challenge when you follow the numbers. Everyone's body is different, but there are Universal truths that make or break any fat-loss program for all of us. This book explains the simple science behind building your ideal body based on your goals. Nate Clark spent most of his life wearing a t-shirt in the pool. He's not a personal trainer or a professional athlete. He's not selling you anything else. He's just a guy who finally figured it out, and transformed his body in ways he never thought possible. After 20 years of failed diets and way too much cardio, he discovered the truth about cutting fat and building lean muscle mass. At 40 years old, he's in the best shape of his life. In This Book You'll Discover: ? You DON'T need to spend endless hours on a treadmill. Cardio is NOT the key to fat loss! ? You DON'T need to waste all your free time in a gym. You can train effectively with a 3-, 4- or 5-day split, ? based on YOUR goals. ? You DON'T need to spend \$250/ month on CrossFit. No more flipping tires in a parking lot! ? You CAN achieve your ideal body at any age. Don't let anyone tell you it's genetics or luck or that you need to devote your entire life to fitness. That's bullish*t! ? You CAN be lean and muscular while also living your life, spending time with friends and family, and being a regular person. ? You CAN increase your energy and feel healthy by optimizing your diet and exercise routine without going to extremes. Buy How I Did It to learn how to achieve the body of your dreams!

Benchmarking Telemedicine: Improving Health Security in the Balkans C.S. Stone 2017-10-25 Health security is dependent on many factors such as: individual government policies and regulations; budgets; management systems; and the collection, analysis, use, and protection of data. Telemedicine has the potential to change how healthcare is delivered around the world, and has developed to the point where it is possible for its use to become commonplace. The questions are, however, whether and how the use of telemedicine will improve health security in Southeast Europe. This book presents papers from the NATO Advanced Research Workshop (ARW) on Benchmarking Telemedicine: Improving Health Security in the Balkans, held in Skopje, Macedonia, in November 2016. The aim of the workshop was to bring together people from a wide range of sectors within the telemedicine community with representatives of NATO Member and Partner countries to share information and develop solutions to health security issues. Participants addressed issues such as cyber security for the implementation of telemedicine; healthcare capabilities of deployed and local medical equipment; learning methods; information sharing among local professionals; prevention and control of infectious diseases; best practices of telemedicine among NATO Member and Partner countries; integration of telemedicine across regions and borders; and telemedicine implementation. The book will be of interest to all those wishing to gain a better insight into the implications of telemedicine for health security.
