Human Factors of a Global Society Tadeusz Marek 2014-06-02 During the last 60 years the discipline of human factors (HF) has evolved alongside progress in engineering, technology, and business. Contemporary HF is clearly shifting towards addressing the human-centered design paradigm for much larger and complex societal systems, the effectiveness of which is affected by recent advances in engineering, science, and education. *Human Factors of a Global Society: A System of Systems Perspective* explores the future challenges and potential contributions of the human factors discipline in the Conceptual Age of human creativity and social responsibility. Written by a team of experts and pioneers, this book examines the human aspects related to contemporary societal developments in science, engineering, and higher education in the context of unprecedented progress in those areas. It also discusses new paradigms for higher education, including education delivery, and administration from a systems of systems perspective. It then examines the future challenges and potential contributions of the human factors discipline. While there are other books that focus on systems engineering or on a specific area of human factors, this book unifies these different perspectives into a holistic point of view. It gives you an understanding of human factors as it relates to the global enterprise system and its newly emerging characteristics such as quality, system complexity, evolving management system and its role in social and behavioral changes. By exploring the human aspects related to actual societal developments in science, the book opens a new horizon for the HF community.

Strategic Marketing For Health Care Organizations Philip Kotler 2020-12-31 A thorough update to a best-selling text emphasizing how marketing solves a wide range of health care problems. There has been an unmet need for a health care marketing text that focuses on solving real-world health care problems. The all new second edition of *Strategic Marketing for Health Care Organizations* meets this need by using an innovative approach supported by the authors' deep academic, health management, and medical experience. Kotler, Stevens, and Shalowitz begin by establishing a foundation of marketing management principles. A stepwise approach is used to guide readers through the application of these marketing concepts to a physician marketing plan. The value of using environmental analysis to detect health care market opportunities and threats then follows. Readers are shown how secondary and primary marketing research is used to analyze environmental forces affecting a wide range of health care market participants. The heart of the book demonstrates how health management problems are solved using marketing tools and the latest available market data and information. Since the health care market is broad, heterogenous, and interconnected, it is important to have a comprehensive perspective. Individual chapters cover marketing for consumers, physicians, hospitals, health tech companies, biopharma companies, and social cause marketing – with strategies in this last chapter very relevant to the Covid-19 pandemic. Each chapter gives readers the opportunity to improve marketing problem-solving skills through discussion questions, case studies, and exercises.

Up and Out of Poverty Philip T. Kotler 2009-06-11 In this book, legendary marketing expert Philip Kotler and social marketing innovator Nancy Lee consider poverty from a radically different and powerfully new viewpoint: that of the marketer. Kotler and Lee assess each proposed path to poverty reduction, from traditional large-scale foreign aid to improved education and job training, economic development to microfinance. They offer powerful new insights into why so many anti-poverty programs fail - and propose a new paradigm that can achieve far better results. Kotler and Lee show how to apply advanced marketing strategies and techniques - including segmentation, targeting, and positioning - to systematically put in place the conditions poor people need to escape poverty. Through real case studies, you'll learn how these marketing techniques can help promote health, education, community building, personal motivation, and more. The authors provide the first complete, marketing-informed methodology for addressing specific poverty-related problems - and assessing the results. They also demonstrate how national and local anti-poverty programs can be improved by more effectively linking government, NGOs, and private companies. Over the past 30 years, the authors' social marketing techniques have been successfully applied to health care, environmental protection, family planning, and many other social challenges. Now, Kotler and Lee show how they can be applied to the largest social challenge of all: global poverty.
