From Peasant to Patriarch Ioann Shusherin 2007 Nikon (1605-1681), patriarch of Moscow and all Russia, is best known for imposing the religious reforms that ultimately led to the schism of the Russian Orthodox Church. Yet only the Account of Birth, Life, and Uprising of His Holiness Nikon, Patriarch of Moscow and All Russia (1680s), comes close to immortalizing the vicissitudes of Nikon's entire life. Written by Ioann Shusherin's (d. 1693), the patriarch's protégé and confidant, the Account presents Nikon as he appeared to his contemporary supporters. The biography chronicles Nikon's steady rise through the ecclesiastical ranks, dramatic downfall, and extraordinary rehabilitation. While discussing Nikonian religious reforms, the Account focuses on Nikon's relationship with the Romanov royal family and his monastery building program, especially the early history of the New Jerusalem Monastery and its main sanctuary, the Church of the Resurrection. This unique narrative features rare eyewitness accounts of momentous and daily life during a period of unprecedented political, religious, and social change in Russia. From Peasant to Patriarch is the first English language translation of the Account. Dr. Kevin Kain and Dr. Katia Levintova offer extensive commentary, parallel texts, and a glossary of Russian terms that contribute to the depth of this text. From Peasant to Patriarch opens new doors to the study of Russian history, religion, and culture.

Lighting Essentials Don Giannatti 2012-04-01 The core goal of photography is representing subjects that have depth and texture in a medium that inherently lacks both those qualities, and this book shows the best way to rise to that challenge: through the careful application and capture of lighting. It demonstrates how to accentuate or minimize textures, add or subtract highlights, and create or combat shadows to showcase the subjects in the best way and create the illusion of a third dimension in the images. Exploring techniques for lighting portraits, still-life subjects, nature images, and architectural shots, both studio and location lighting are covered in detail. The book teaches photographers how to study their subjects with all of the textures, colors, shapes, and surfaces they have then visualize the image as a finished photograph before the photography actually begins. With chapters that thoroughly cover the science of lighting and visualization, photographers can apply that knowledge and successfully create artful images.

Welcome to the age of the algorithm, the story of a not-too-distant future where machines rule supreme, making important decisions - in healthcare, transport, finance, security, what we watch, where we go even who we send to prison. So how much should we rely on them? What kind of future do we want? Hannah Fry takes us on a tour of the good, the bad and the downright ugly of the algorithms that surround us. In Hello World she lifts the lid on their inner workings, demonstrates their power, exposes their limitations, and examines whether they really are an improvement on the humans they are replacing. Terra Flamma Stuart Palley 2018 From the towering pines of Shasta Trinity National Forest, to the chaparral scrub of San Diego's Mexican border, to Yosemite and the Western Sierras, trained wildland firefighter and photojournalist Stuart Palley documents California's raging wildfires and the forces behind them during the state's worst fire season in modern history. The dramatic images, a half-decade in the making, capture the simultaneous beauty and destruction that wildfires bring as fire seasons get longer and more deadly, expensive, and destructive. In the wake of California's record-breaking series of wildfires in 2017, the images encompass five fire seasons and forty-five fires. They are presented chronologically and culminate with the wine country fire siege that devastated Sonoma and Napa counties in October 2017 and the Thomas Fire in Southern California, the largest in recorded state history. This timely book defines the state's drought and urban sprawl challenges, drawing a broader picture of global warming and its acute effects worldwide.
