Virtual-Office Tools for a High-Margin Practice David J. Drucker 2010-05-18 Tired of spending more time with filing cabinets than with clients? Is overhead eating up margins? Now, two leading financial planners and columnists deliver the help advisers have been begging for. Virtual-Office Tools for a High-Margin Practice is a nontechnical trove of technology, clever workarounds, and procedural efficiencies tailored to help financial advisers move toward a paperless office, while still complying with SEC record-keeping requirements. The authors show planners how to reduce the amount of paperwork in their offices by 99 percent, slash overhead, and find anything they need in one minute or less by adapting innovative software tools and shifting from on-site employees to remote assistants and virtual work partners. Until now, creative ways of working this smart were hard to come by. With this book, they are available, ready to go, and easy to implement.

Encyclopedia of Nursing Education Mary Jane Smith 2015-02-20 Written by luminaries in the field of nursing education, this is the only current and comprehensive compendium of important topics in nursing education. It contains more than 175 detailed entries, and will be a valuable reference text for doctoral- and master's-level nursing students, nursing faculty, university and hospital libraries worldwide, and hospital nursing departments and schools. The listing of entries has been carefully culled from recent nursing literature and six volumes of the Annual Review of Nursing Education. Each entry follows a standard template that includes definition, application in nursing education, a synopsis including a brief summary of what is in the literature on the topic, and a concluding summary discussing future development in nursing education. Listings are alphabetized for easy access, and are accompanied by a comprehensive reference list. KEY FEATURES: The only current compendium of important topics in nursing education Includes all topics relevant to nursing education based on a review of the literature Alphabetized and consistently formatted for easy access to information Includes comprehensive reference lists per topic Written by expert nurse educators A listing of teaching topics compiled by the editors is available to instructors

Multiple-Criteria Decision-Making (MCDM) Techniques for Business Processes Information Management Edmundas Kazimieras Zavadskas Information management is a common paradigm in modern decision-making. A wide range of decision-making techniques have been proposed in the literature to model complex business processes. In this Special Issue, 16 selected and peer-reviewed original research articles contribute to business information management in various current real-world problems by proposing crisp or uncertain multiple-criteria decision-making (MCDM) models and techniques, mostly including multi-attribute decision-making (MADM) approaches in addition to a single paper proposing an interactive multi-objective decision-making (MODM) approach. The papers are mainly concentrated in three application areas: supplier selection and rational order allocation, the evaluation and selection of goods or facilities, and personnel selection/partner selection. A number of new approaches are proposed that are expected to attract great interest from the research community.

Problem-Driven Political Economy Analysis Verena Fritz 2014-01-13 Problem-driven political economy analysis holds considerable promise for

development practitioners seeking to identify policies and strategies that are most likely to deliver solutions for difficult development challenges. This volume takes stock of the World Bank's experiences applying this approach. The eight good practice cases presented in this volume illustrate recent Bank achievements. Problem-Driven Political Economy Analysis: The World Bank's Experience shows how political economy analysis can be applied to specific development challenges from different sectors, highlights the range of empirical evidence that can be used and discusses the types of recommendations and follow up actions that result. Each case opens by describing the specific challenge or opportunity that prompted the analysis: an emerging natural resource boom in Mongolia, a growing need for subsidy reform in Morocco, difficult constellations around electricity sector reform in the Dominican Republic, electricity and telecommunications reforms in Zambia, the development of inclusive commercial agriculture in Ghana, infrastructure programs at the subnational level in Sierra Leone, local infrastructure provision in Papua New Guinea, and the allocation of local roads and health services in the Philippines. The cases then review key findings, describing how political economy drivers impeded first best economically efficient or technically sound reforms and how the incentives at play offer opportunities for engagement. Each case then sets out the feasible policy recommendations derived from the analysis, including specific recommendations for how development interventions can be adapted to existing political economy constraints and—where possible—how to engage on expanding the space for reform. Finally, there is a reflection on the uptake and effects of the problem-driven analysis on World Bank operations and on policy dialogue.
