15 Years of The Mountain School of Arts (Teacher's Edition) John Pike 2020-10-21 The work on this book started in March 2020 with an archive of pictures acquired from previous Mountain School of Arts students, staff and faculty. The collection consists of around 2000 images taken over the last 15 years. Most of the photographs were shot with older digital or phone cameras with the addition of some analog footnotes. We consider the photographs to be documents of the many different shapes, forms and people that have taken part in the Mountain School of Arts program since its inception in 2005.

Selected Writings Mikhail Alekseevich Kuzmin 2005 This book consists largely of previously untranslated work. Kuzmin was a master of many genres: poet, dramatist, writer of narrative prose, and influential literary manifestos. All these facets of Kuzmin's creativity are represented in this volume, which traces his development from a decadent to a key figure of Russia's artistic underground during the repression of the Soviet period. A cycle of poems, Thrall (1919), published here for the first time in English, provides the book with its dominant theme. Thrall is a leitmotif of Kuzmin's early love poetry, where it signifies a lover's impassioned submission. Kuzmin the playwright is represented here by his only full-length drama, The Death of Nero (1929); Kuzmin the prose writer by two short stories that exemplify contrasting periods of his evolution. The collection also contains two literary manifestos that played pivotal roles in the development of Russian letters. -- Bucknell University Press.

Psychology of the Image Michael Forrester 2012-12-06 Psychology of the Image outlines a theoretical framework bringing together the semiotic concepts developed by Charles Peirce, the sociological insights of Ervin Goffman and the psychoanalytic ideas of Jacques Lacan. Image studies in fashion, advertising, photography, film studies and psychology have been influenced by these theorists in significant ways. The framework presented helps the reader understand how these ideas relate to the study of different domains of the image: the internal imagery of dreams, external images such as the photograph and image processes which span both contexts, e.g., images we have about ourselves. The topics discussed are organised into three themes. The first considers mental imagery, including sound and dreams. The second addresses the interdependent nature of internal and external images, e.g., the gendered self and social identity. In the third theme, attention turns to external images including television, film, photography, the computer and the internet. Psychology of the Image will be of interest to undergraduates, postgraduates, lecturers and researchers in the fields of psychology, media studies and sociology.
