[Innovative Approaches to the Complex Care of Contemporary Art Iwona Szmelter 2012](#) This volume seeks a solution to the problem of methods of preservation for the rapidly developing and complex field of contemporary and modern visual art. Despite adopting the new concept of heritage, the aims and methods of conservation have remained the same, evolving very slowly by following some changes in the history of ideas, human experience and techniques of conservation. The authors of Innovative Approaches to the Complex Care of Modern and Contemporary Art relate complex conservation practices to an awareness of the need for a multidimensional approach to the care of modern and contemporary art. Maintaining a dialogue with history, they boldly confront the typical patterns and accepted evolution of the theory of conservation by looking at the wider perspective including the most recent history of any work of art - documentation, interviews with artists, records of image, the sound of performance, consent to e-installation, emulation etc. - and bearing in mind as the first principle *primum non nocere* and various legal issues.

Protecting Forest and Marine Biodiversity Ed Couzens 2017-11-24 This timely book contributes to discussions on the best legal practices to use to promote conservation, protection and sustainable use of biological diversity in forest and marine areas. The breadth of issues explored across these two themes is immense, and the book identifies both key differences, and striking commonalities between them.

Summer of 1977 Doug Freedline 2009-09-17 It was a quest that was considered by many to be impossible, stupid, and risky. But avid bicyclist and author Doug Freedline was determined to succeed on this planned bike trip that would take him around the Great Lakes, across Canada, down the Pacific Coast, across the Rockies, to the tip of Florida, and back to Pennsylvania. This memoir chronicles Freedline's more than 9,000-mile, four-and-a-half-month road trip that began and ended in Indiana, Pennsylvania, in the summer of 1977. It was a journey that took him across a continent replete with natural wonders, quaint towns, and unforgettable people. Freedline not only discovered that he had the inner resources to overcome the past and complete any endeavor he started, but he found that the cold, cruel world that others professed to see did not actually exist. Much more than a travelogue, *Summer of 1977* demonstrates how one man's dream served as the impetus for finding the courage to attend college, earn a degree, and motivate others to improve their lives.

Securitization, Accountability and Risk Management Karin Svedberg Helgesson 2012-01-25 This edited volume examines the reconstitution of the public security domain since the 9/11 attacks, focusing on the banking sector and anti-money laundering (AML) activity in particular. Since the inception of the 'Financial Action Taskforce' (FATF) in 1989, AML has been viewed as a global problem. This text argues that the securitization of the financial sector as a result of AML has entailed the emergence of a new public security domain, which transcends the classic public-private divide. The analysis in the volume is multidisciplinary and combines concepts and theories from the literature on securitization, the public-private divide, and business/management. The authors argue that the state is under transformation and that the developments in the security field are part of an ongoing renegotiation of the relationship between the state and the business sector. *Securitization, Accountability and Risk Management* therefore contributes to a deeper understanding of how the power relationships have changed between the public and the private sectors after 9/11. This interdisciplinary book will be of much interest to students of critical security, risk management, business studies, critical legal studies and IR in general.
