Erasmus, Man of Letters Lisa Jardine 2015-06-23 The name Erasmus of Rotterdam conjures up a golden age of scholarly integrity and the disinterested pursuit of knowledge, when learning could command public admiration without the need for authorial self-promotion. Lisa Jardine, however, shows that Erasmus self-consciously created his own reputation as the central figure of the European intellectual world. Erasmus himself—the historical as opposed to the figural individual—was a brilliant, maverick innovator, who achieved little formal academic recognition in his own lifetime. What Jardine offers here is not only a fascinating study of Erasmus

but also a bold account of a key moment in Western history, a time when it first became possible to believe in the existence of something that could be designated "European thought."

The Grove Encyclopedia of Northern Renaissance Art Gordon Campbell 2009-11-26 The Grove Encyclopedia of Northern Renaissance Art (GENR) deals with all aspects of Northern Renaissance art ranging from artists, architecture, and patrons, to the cities and centres of production vital to the flourishing of art in this period. Drawing upon the unsurpassed scholarship in The Dictionary of Art and adding dozens of new entries, GENR is a comprehensive reference resource on this important area.

The Renaissance Paul Johnson 2013-10-31 A fresh and vigorous appreciation of the intellectual liberation and artistic triumphs of the Italian Renaissance. The development of the first universities from the 12th century onwards, growing wealth and patronage in certain cities, and above all the invention of printing and cheap paper, provided essential conditions for the Renaissance. And it was in literature and scholarship that it began, in the rebirth of classical culture that loosened the Church's iron grip on visual art. Paul Johnson tells the story, in turn, of Renaissance literature, sculpture, building and painting. Despite the critical importance of inventions outside Italy - printing in Germany and oil painting in Holland - he locates the Renaissance firmly in Italy and in Florence above all, between 1400 and 1560. There are memorable sketches of the key figures - the frugal and shockingly original Donatello, the awesome Michelangelo, the delicacy of Giovanni Bellini. The final part

of the book charts the spread and decline of the Renaissance, as the Catholic Church repositioned itself to counter the Reformation which the Renaissance had itself helped to produce.

Teach with Magic Kevin Roughton 2021-05 Learn from the Engagement Masters Education is a battle for attention.

Whether you are a teacher trying to reach a classroom full of students or a parent trying to prepare your child for the world to come, getting our audience to just listen can be a real challenge. When students have access to personalized entertainment sitting in their pockets, anything that doesn't jump out and grab their attention right away is easily drowned out. But there is a place where even today all those modern distractions melt away--Disneyland. When you're there, you're not only in a different world, you're in Walt Disney's world. Whether you are Peter Pan flying over London in Fantasyland or a rebel fighter struggling against the First Order in Galaxy's Edge, you are 100% engaged. Sights, sounds and even smells ensure that your brain is locked into the experience. If we can bring those techniques into our teaching, we can create engaging experiences for our students, grab their attention, and boost their learning. You'll improve your teaching and create a place students want to visit. In this book we'll learn from the world's greatest engagement masters--the Disney Imagineers. Through narrative visits to attractions throughout Disneyland and Disney California Adventure, you'll experience a visit to the park as we share memories and see how the Imagineers make it all work. We'll be guided by Imagineering icon Marty Sklar's Mickey's 10 Commandments of Theme Park Design as we turn our classrooms into the most engaging places on

Earth!
