Game Feel Steve Swink 2008-10-13 "Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by

consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

EXTRACT In the kingdom of Hyrule, a legend has been passed down since the beginning of time: A mysterious artifact known as the Triforce, symbolized by three golden triangles arranged to form a fourth triangle, is said to possess mystical powers. It is hardly surprising that this object has been coveted by many power-hungry men over the centuries. One day, the evil Ganon, the Prince of Darkness whose ambition is to subjugate the entire world to his will, sends his armies to attack the peaceful kingdom. He manages to capture one of the fragments of the Triforce, the triangle of power. Daughter of the king of Hyrule, Princess Zelda is terrified at the prospect of seeing Ganon's armies swarming over the world. She, too, seizes a fragment of the Triforce, the triangle of wisdom, and chooses to break it into

eight pieces, which she then scatters across the world, hiding them to prevent Ganon from ever acquiring them. She then orders her faithful nursemaid Impa to go forth and seek a warrior brave enough to challenge Ganon. As Impa roams the kingdom of Hyrule in the hope of finding a savior, Ganon learns of Zelda's plans and has her locked up before sending his men to track down the nursemaid. Surrounded by these ruthless creatures, Impa is saved by a young boy named Link at the very moment when it appears that all is lost. As unbelievable as it may seem, Link has been chosen by the golden triangle of courage, and thus holds a part of the Triforce himself. Convinced that she has finally found the one who will save the kingdom, Impa hurries to tell him her story. Link accepts his mission to rescue Zelda without hesitation. Before confronting Ganon, however, he will have to gather the eight fragments of the triangle of wisdom, which are his only hope of gaining entry to the dungeon deep beneath Death Mountain where the Prince of Darkness hides. His quest has only just begun.
